

Remarks

The specification is amended to correct a typographical error to the name of the first inventor.

The specification is also amended to correct a typographical error to the provisional patent application number to which this application claims priority to.

Applicants made a bonafide attempt to claim priority in the application papers submitted. The error was one numeral in the provisional application serial number that was typographically wrong. This typographical error was never brought to our attention in a first Office Action by the Examiner because the Examiner never filed an Office Action in this matter. The Examiner also did not point out the deficiency in the originally filed Declaration for Patent Application (which had the same typographical error in the provisional application number) in the Notice of Allowance dated April 7, 2004. Applicants' attorney, in reviewing the application for completeness before payment of issue fee, noted this defect, and prepared a Supplemental Declaration for Patent Application for the inventors to sign.

Attached hereto is a signed and dated Supplemental Declaration for Utility or Design Patent Application and Power of Attorney in which the correct provisional application number 60/393,088 is listed therein.

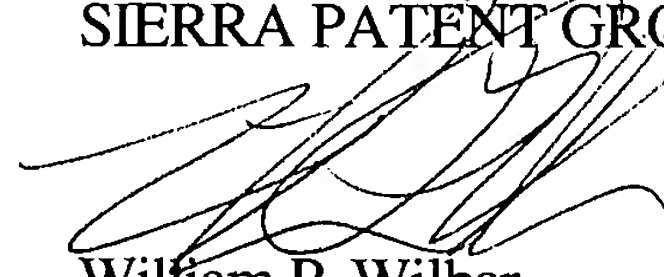

It is respectfully submitted that a bonafide attempt was made to claim priority, and acknowledgement of this priority (as corrected in this Amendment After Allowance) is therefore requested.

No new matter is introduced.
